Exceptional materials

Isabella uses only the best materials, made by the world's leading suppliers.

Isacryl is a spinneret-dyed (i.e. the fibres are dyed), textured-weave, durable acrylic material. Isacryl has the highest achievable fade-resistance thanks to the pigmentation method. The density of the weave plus the impregnation all the way through minimize water ingress. Nevertheless, Isacryl is a breathable material, which facilitates the best possible indoor climate in the awning.

Lower panel – PVC is an ultra-durable, 100% waterproof material that is easy to clean.

Window – Polyester The window foil is the best available on the market. To reduce the effect of the sun's rays, we use a UV-absorbing window foil and, in some models, a matt foil is used for maximum privacy. A foil capable of withstanding extreme temperatures is used in awnings designed for winter use.

Roof The roof of Isabella awnings are made of durable, UV-resistant polyester, which protects you from the sun's UV rays when inside the awning. The roof fabric itself is treated with three layers of breathable acrylic. Moisture is thus absorbed more easily, reducing condensation in the awning. The dirt and water repellency of the material restricts the accumulation of dirt.

The inside of the roof is patterned, providing a pleasant indoor environment and reducing the visibility of dirt.

A-Measurement

Back in 1967, Isabella's founder Søren Odgaard invented a new measuring system for awnings. He named the measuring system "A-mål", or "A-measurement" in English.

The A-measurement basically standardises awning measurements. Having a number of standard sizes that fit virtually all caravans eliminates the need to sew awnings to fit the multitude of different caravans.

Every year, when new caravans are launched, our skilled specialists go out and take their A-measurement. All these measurements ensure that Isabella's A-measurement calculator is always fully up to date.

To determine the “A-size”

Park the caravan on level ground. The “A-size” is the length from ground level, through the awning channel and back down to the ground. This can be done easily with a piece of string. We have a database of caravan sizes from 1970 onwards on our website, www.isabella.net. For Porch/Part awnings the caravan channel height determines the fit.

A-measurement awning as large porch

All Isabella A-measurement awnings can also be used as part awnings. Using a foam pad, support pole and two click profiles. Measure your caravan “Full awning as large/small Porch” as shown and match to the nearest Isabella “A” size. This solution works for new and older models the parts are all supplied as optional extras.

PRISMA SEED

Prisma Seed's flexibility, high durability and strong frame make it the ultimate awning for permanent pitching. The front can be moved back and forth to create a living room with a covered terrace (with the use of optional extras).

The large windows ensure that Prisma Seed is a bright, welcoming awning where you will spend many an enjoyable hour. For maximum stability, Prisma Seed is supplied with the Zinox MegaFrame. If you want to use Prisma Seed as a year-round awning, additional poles can be purchased to ensure added stability in the off-peak season.

Removable/fold-down panels: Front, side and corner panels.

Special features: Flexible front panels, mosquito nets in both sides³, ventilation in the front, light strip in the roof², large windows, wide all-round overhang.

Comes as standard with: Cube Creme curtains, Wheel arch cover, draught skirt, veranda pole, FixOn, awning bag, pole and peg bags including peg remover.

Optional accessories for assembly: Front divider, additional front panels (2 pcs), right or left panel (for partition) which give more scope for variation¹. Annex 250, net side, Eclipse FSC (Ask your dealer about sizes), door canopy, inner roof, storm securing set.

TECHNICAL ILLUSTRATIONS

PENTA FLINT

Penta Flint has everything you require from a permanent pitch awning – a depth of 3.5 m without the nuisance of a centre pole, and designed so that every inch of space is used. The material used is Isacryl, which allows the awning to breathe. Mosquito net windows in both sides, and the numerous opening options, make for an optimal indoor climate.

A sand-coloured roof imbues the awning with a soft warm light and the combination of the light strip in the roof and the large windows of clear film make the Penta Flint awning a bright and friendly place to spend time. The sturdy pole construction and the pentagonal shape mean stability for a long season at the campsite. Choose between the strong Zinox steel frame or the extra-strong Zinox MegaFrame for added stability. The combination of MegaFrame with extra winter securing means you can use your Penta Flint all year round.

Removable/fold-down panels: Front, side and corner panels

Special details: Overhang all the way around, light panels in middle of roof. Two large side ventilation windows with mosquito nets¹, corner door right front, two door options.

Supplied as standard with: Collage Blue curtains, veranda pole, draught skirt, wheel arch cover, FixOn, pole and peg bags, awning bag and peg remover.

Optional extras: Annex 220, door canopy², inner roof, partition wall³, storm securing set.

Villa – The ultimate awning
for year-round camping

Design your own dream villa

Villa is the awning for people who want to stay at the same place year after year, and who don't want to set up an awning and take it down again every season. It is designed to remain standing outside and offers great stability in harsh weather.

Villa is a freestanding tent that will stand on its own when you drive the caravan away. You'll experience the freedom of being on the same campsite year after year while having the option to detach the caravan and go exploring.

Villa is available in five different sizes and is set up using different modules. The many options let you design your own dream Villa.

- 1) Choose the size of your Villa
- 2) Choose the front panels you want
- 3) Choose how you want to combine them
- 4) Decide whether you want to expand with a tunnel and a covered porch

Villa can be extended by as much as 34 m². To create more space in the Villa, you can buy a tunnel, which gives you an extra depth of 70 cm. Why not use that extra depth to install a kitchen or create a TV room? If you want to enjoy the warm summer evenings longer, you can buy a covered porch for the right or left side of your Villa.

Talk to your dealer about sizes and combination options, or find more information at **www.isabella.net**

The picture shows a Villa 850 with integrated porch.

VILLA

For year-round campers/ permanent pitchers

Villa a unique year-round/permanent pitching awning, available in 5 widths. Its construction has been designed with maximum stability and durability in mind. Isabella Villa is modular, and the choice of front panels mean that you can construct your Villa just as you want it.

The awning should not only be suitable for use on hot summer days, but also a good alternative when the snow is lying on the ground. Year-round use places high demands on the equipment, and Isabella Villa is composed of the best materials. The optimal sloping of the roof prevents the build-up of snow. Light is life, and the large windows and white curtains contribute to a bright, comfortable living space.

The window material can withstand temperatures down to -30°C, and Villa also comes

with flaps in the fabric to make it easy to close and cover the windows as required. The deep all-round overhang limits dirt and pollution.

Isabella Villa has been designed to make it easy for you to put up yourself. Your local dealer can also advise you if you wish to have it ready-assembled. The modules are zipped together, simplifying the construction and making it easy to change the front modules without having to dismantle the entire awning. All fronts and gables are fixed in aluminium profiles – both horizontally and vertically. This gives you great stability even in harsh weather.

Villa can be used with caravans of any size, as it comes with a padded cushion against the caravan and a connecting piece between the roof and caravan. (Isabella Villa

is equipped with a padded sluice and connecting piece in the roof, so it can be used on all sizes of caravan (special adjustment may be necessary, especially on small caravans). The caravan can be attached or removed in a few easy steps, though full backing is required (extra) if Isabella Villa is to stand without the caravan.

TECHNICAL INFORMATION

Ground: Depth 300 cm.
Length 550 cm, 650 cm, 750 cm, 850 cm, 950 cm
No. of doors: At least two.
Attachment to caravan: Padded cushion and connecting piece
Other: Ventilation in both sides. All-round overhang.

SUPPLIED AS STANDARD

Curtains: Cube Creme.
Villa comes with a connecting piece between the caravan and awning, two cushions, draught skirt and standard wheel arch cover. It also includes two 74 cm back wall sections.

OPTIONAL EXTRAS (ADDITIONAL COST)

Closing back wall panel.
Inner roof.
Winter securing set (cross bar and support poles).
Gutter.
F-module: Closable front panel with mosquito net.
Villa door
Villa tunnel

PATIO

A covered patio can be set up on the left or right side. The porch measures 2 x 3 m

TUNNEL

If you want to increase the depth between the rear wall sections from 3 m to 3.70 m, you can install a connection tunnel.

IMPORTANT!

Villa must be mounted on a solid floor with exact measurements: 300 x 550 cm, 300 x 650 cm, 300 x 750 cm, 300 x 850 cm, 300 x 950 cm. The distance from the top of the floor to the rail on the caravan must be 235–240 cm for optimal connection to the vehicle.

Talk to your dealer or a local carpenter about this.

COMMODORE DAWN

4

1

COMMODORE DAWN ® NORTH

Commodore is a fusion of classic Isabella design and contemporary materials. Its depth of 3 metres and the choice of three types of frames are a major advantage, especially for those who alternate between permanent pitching and touring and enjoy having plenty of space in the awning. Large panoramic windows make Commodore a pleasant place to be, with a unique inflow of light. For a pleasant indoor climate, the Commodore model has mosquito nets with a foil cover in both sides, as well as an integrated top ventilation panel in the middle of the front. On hot days and balmy evenings, the nets keep out annoying insects, at the same time allowing the air in the awning to circulate.

Commodore is available both as an Dawn and a North model.

2.5 m, see pages 16-19

Removable/fold-down panels: Front and side panels.

Special details: Integrated top ventilation¹, Mosquito net in both sides².

Comes as standard with: Cube Creme curtains (North)³ Collage Sand (Dawn). Veranda pole⁴, draught skirt, wheel arch cover, FixOn, Typhoon storm sashes awning bag, pole and peg bag including peg remover.

Optional extras for assembly: Annex 250, door canopy, net side, net front, Cosy Corner II, partition wall, Eclipse front sun canopy, gutter, storm securing set.

AMBASSADOR DAWN

With more than 30 years on the market, our customers rightly expect a lot of the 'Ambassador', the ultimate touring awning which is straightforward to put up. Relatively light in weight, with a depth of 2.5m it offers all the opening options you could possibly wish for. Ambassador Dawn has a mosquito net panel in both sides and is made of Isacryl for a pleasant indoor climate. The roof is coated on the outside and has a patterned inside, which minimises the formation of condensation.

For a good, natural inflow of daylight, and to ensure that the awning is a light and accommodating place to spend time, Ambassador Dawn has large, panelled panorama windows in the front.

Attention to detail

Smart, carefully considered details ensure simple function and ease of use. The same carefully considered details also ensure durability. An awning is an investment that must hold its value. Both its utility value – holiday after holiday – and its sales value in the event that the Isabella awning is sold on to happy, new owners.

FixOn™ screwless brackets designed for better tensioning, with easy positioning. Supplied with all Isabella awnings.

Substantial four way zips, always run smoothly. Hard wearing and always covered to protect from sun and rain.

DropStop™ rain grommets are fitted to all rivets in the roof.

Heavy-duty hard-wearing reinforcements. All D-rings are sewn with PVC reinforcements.

IsaFlex™ pegging elastics with great elasticity and strength are supplied with the Isabella range.

is a focus on quality

The double-folded seams in the roof guarantee a 100% straight & waterproof seam for a better shape roof. The curve of the roof is designed to ensure the best possible fit and better tensioning of the awning.

Door ties with press studs for all Isabella awnings.

All Isabella awnings have ventilation panels; some are fitted with extra panels and/or mosquito net(s) in the side, these reduce condensation and create the best indoor climate.

Regulator tabs in the corners and spiked shoes on the poles ensure uniform tensioning and reduce wear and tear "locking" the canvas and frame together.

The double wing, with separate beading and seam detail, ensures a great fit on all caravan shapes. .

Internal mud flap allow the pegging elastics to perform correctly and prevents drafts in the awning. Laying carpet over the mud flap makes an effective draft excluder.

MAGNUM FLINT 340 & 400

Magnum 340 and 400 Flint are touring-friendly porches, which are quick to put up when you're on the go. With Magnum 340 or 400 Flint, you get a spacious touring awning with a depth of 2.5 metres and a width of either 3.4 or 4 metres. The front and side panels can be folded down/removed and, together with two mosquito net sides, offer a wealth of ventilation options.

If more space is required, inside or out, Magnum 340 and 400 Flint can be extended with an Eclipse front sun canopy (specially designed for Magnum), Cosy Corner (specially designed for Magnum), and an annex giving you an extra bedroom or additional storage space. Magnum 340 and 400 Flint are made of Isacryl, which ensures a

MINOR DAWN

When it has to be easy, smart and comfortable, Minor Dawn is the answer. Minor Dawn comes with a lightweight CarbonX fibreglass frame – which is fast and easy to assemble. The window in the removable front panel provides a natural inflow of light and a good view. There are doors and a mosquito net in both sides, which can be closed by zipping the foil cover over it. The material is breathable Isacryl which helps create a pleasant indoor climate. As with all of Isabella's porches, you get the best seal to the caravan.

Removable/fold-down panels: Front panel.

Special details: Mosquito net¹ and entrance door in both sides.

Supplied as standard with: Set of curtains Collage Sand, draught skirt, wheel arch cover, FixOn, awning bag, pole and peg bag incl. peg remover.

Optional extras for assembly: Veranda pole, storm securing set.

UNIVERSAL DAWN 360

UNIVERSAL DAWN 360 & 420

Thanks to their great strength and stability, the Universal 360 and 420 Dawn porches can be put up in all weather conditions – all year round. Two support poles press the sewn-in foam pads securely against the side of the caravan, while click profiles hold the sides directly on the support pole for a perfect seal. Universal 360 and 420 Dawn have doors in both sides and large windows across the front, giving a good view. The strong Zinox steel frame ensures good stability. If Universal 360 or 420 Dawn is to be used as a year-round awning, we recommend the fitting of winter securing and an inner roof (optional extras). The roof construction provides unobstructed opening of the caravan door and minimal build-up of snow.

Removable/fold-down panels: Front and side panels.

Special details: Ventilation in both sides³ and adjustable front ventilation. External mud flap², flexible pegging, special sloping roof which makes the awning suitable for year-round camping, extra heavy-duty window film. (frost proof)

Supplied as standard with: Collage Sand curtains¹, veranda pole, draught skirt, wheel arch cover, FixOn, awning bag, pole and peg bags including peg remover.

Optional extras: Annex 220, Door canopy, inner roof, winter securing set, storm securing set.

Use: Year round.

Fits: Caravans with awning rail height of between 235 and 250 cm

Isabella
AIR

NEW!

Isabella AIR awning

Isabella AIR sets new standards in air awnings.

It combines the expertise gained from more than 60 years of awning development with a carefully considered design and the latest IsaAir system.

With Isabella AIR, we refuse to compromise on the materials. We only use the same well-known Isabella materials that we use in our traditional Isabella awnings. The awning is made in Europe, from the treatment of the fabric to the finished, sewn awning.

THE ISAIR SYSTEM

- Just one inflation point for pumping up
- Extra strong, durable three-layer air beams
- User-friendly click system with on/off switch for easy replacement of air beam

DESIGN

- Spacious living area with high ceiling
- Classic Isabella design
- Option of large annex on both sides, doubling the awning area

MATERIALS

- Breathable, maintenance-friendly material
- UV-resistant material on the front and sides makes the awning resistant to the sun rays
- Familiar, tried-and-tested Isabella materials

NEW

ISABELLA AIR CIRRUS NORTH 400

Cirrus North is a combination of classic Isabella design, high-quality materials and a new IsaAir system. The fronts and gables are made in our traditional solid-dyed Isacryl, which is a lightweight, robust and above all breathable material.

Thanks to the solid-dyed material, your air awning will retain its beautiful colours for many years to come. The Isacryl fabric allows your air awning to breathe, and the large mosquito nets at both sides make for the best possible indoor climate while minimising condensation.

Large living area with a high ceiling

Cirrus North has space for the whole family¹. With a depth of 275 cm and vertical walls, you get a spacious living area with a high ceiling. The space can be further increased with the addition of an Annex on both the right and left sides of the awning. The annex has an extra high zip opening in the sides, making it feel like an integral part of the awning. This gives you a multifunctional additional room measuring 6 m², which can be used as an extra bedroom, dining area, playroom, etc. With Air Annex on both sides, you double the area of the awning.

No extra poles

A special detail of Cirrus North is that it comes with no extra poles. The awning consists solely of air beams, so you don't have to put extra poles in the canopy or by the caravan. The canopy protects the awning from the elements while providing pleasant shade.

User-friendly air system

The IsaAir system has just one inflation point^A for pumping up and is extremely easy to operate. The modular air system, with a valve connection between all modules, allows you to simply isolate an air beam^B after closing the valve connection to the other modules and replace it without having to take the awning down. The On/Off switch^C indicates clearly if it is open or closed. The air beams^D consist of three layers for airtightness and stability.

Special details: Front canopy (air beams)², fitted with 2 beading diameter options, light panels in the roof³, two large ventilation windows⁴ with mosquito nets at both ends, IsaAir system, Isacryl fabrics; extendable⁵.

Supplied as standard with: Cube Creme curtains, air beam for the veranda solution specially developed, high-performance hand pump with pressure release valve, draught skirt, wheel arch cover, Typhoon storm sashes, awning bag, peg bag including peg remover.

Optional extras for assembly: Air annex (250 x 250 cm.) for left or right side, Inner Roof, fitted floor.

Fits: Caravans with awning rail heights between 242 cm and 255 cm.

Poles for any purpose

CarbonX™ frame

a carbon-fibre reinforced fibreglass frame, is suitable for both permanent and touring caravanning. Carbon Fibres are combined with glass fibres in varying amounts, according to pole diameters, to offer maximum strength. The frame is light and fully corrosion resistant. All CarbonX frames are supplied with the IsaFix locking mechanism. With IsaFix in place, keeping the frame in position is easy. With one press of the hand grip, a discreet “click” tells you IsaFix is locked in position.

Zinox™ MegaFrame

The Zinox MegaFrame is a durable tubular steel frame (material thickness: 32 mm/1.2 mm) with welded corners and MegaFix on the poles. MegaFrame is designed for year-round use with a full awning which can remain standing all year, and can withstand most powerful storms, snowfall and torrential rain. The Zinox MegaFrame is supplied with two extra rafter poles, as well as one Hercules Triple.

Zinox™ steel frame

is hot galvanised both inside and out to extend its life and to meet all load bearing requirements. The steel frame is made of ISO-certified steel. The strength of the Zinox steel frame makes it particularly suitable for pitching your caravan permanently – and it is included with all Universal and winter porch awnings, because caravanning in the off-peak seasons demands great structural stability due to weather conditions such as strong winds and snow.

VENTURA – PRENOX STEEL FRAME

The external zinc coating of the steel frame is 50% thicker than traditional surfaces, for extra long life.

VENTURA – IXL FIBREGLASS FRAME

Light-weight and corrosion resistant frame. The fibreglass frames for full awnings have Fibremax rafter poles with a mighty 30.5 mm diameter.

FIXON™

FixOn screwless brackets. Designed for better tensioning, with easy positioning.

CarbonX layers

- 1 Lengthwise fibreglass reinforced with carbon
- 2 Cross winding
- 3 Lengthwise fibreglass
- 4 Clockwise cross winding
- 5 Anti-clockwise cross winding
- 6 Lacquer

Zinox layers

- 1 Aluminium/Zinc
- 2 Steel
- 3 Aluminium/Zinc
- 4 Lacquer

**FIXUS™**

All IXL fibreglass frames are supplied with Fixus™ Locking clamps. With Fixus in place, keeping the frame in position is easy. With one press of the hand grip, a discreet “click” tells you that Fixus is locked in position.

900060365

T-Rex™ locking mechanism

for the Zinox steel frame locks the poles in place and keeps them tensioned in all weather conditions with one press of the hand grip and a discreet “click”.

900060412

IsaFix™ locking clamp

All CarbonX frames are supplied with an IsaFix locking bracket. The IsaFix locking bracket helps you to tension the poles of your awning easily and efficiently.

26 mm 900060319

30,5 mm 900060320

SHADOW TOURING SUN CANOPY

Shadow is the multipurpose touring canopy, which can be put up in a jiffy no matter where you are. In addition to being mounted on the caravan itself, Shadow can also be used as a side canopy on the awning. Combine with the sides (optional extras), to give extra shelter and protection against the sun under your Shadow. The particularly strong and stable pins on the poles and metal rings in the roof provide optimal tensioning and greatest possible stability.

Depth (cm): 200

Widths (cm): 240, 300, 360, 400, 500

Poles: CarbonX 240/300: 2 pcs. 360/400/500: 3 pcs.

Supplied as standard with: Typhoon storm sashes, transport bag and pole bag.

Optional extras for assembly: Net side (260010312) with connection strip and beading in both sides¹. The net side is supplied with FixOn brackets and “Tectum” system (roof pole and a click multi-connector for easy assembly)².

SUN CANOPY

SUN SHINE PLUS SUN CANOPY

The greatest possible stability and lowest possible weight are united in the Sun Shine Plus canopy. Sun Shine Plus comes complete with a right and left side. CarbonX frame with the IsaFix connection system make putting up and taking down fast and efficient. If you already have an Isabella full awning in 2.5 m depth, the frame can also be used for the sun canopy. Ask your dealer. A front is available as an optional extra. Enabling your Sun Shine Plus to be converted into a lightweight touring awning in next to no time.

Depth (cm): 250

A-measurement from-to (cm): 800-1175

Special details: Pockets on the front poles.

Supplied as standard with: Right and left-hand side, draught skirt, wheel arch cover, FixOn, transport bag, pole and peg bag.

Optional extras for assembly: Front¹.

ECLIPSE SUN CANOPY

Not only is Eclipse suitable for use as a front sun canopy on Isabella's awning models, but it can also be used as a lightweight touring sun canopy directly on the caravan. Eclipse is fastened to the overhang of your awning, creating a lovely shady terrace and increasing the area under cover. The lightweight CarbonX frame with the IsaFix connection system as well as the TectumPro building system, make it fast to put up. Alternatively, for extra stability a Zinox MegaFrame option is available. For extra shelter, a side can be purchased as an optional extra. It fits both the left and right-hand side of the front sun canopy. Eclipse and the shelter side can also be used on Magnum 340 and 400.

MINI ECLIPSE

Eclipse is also available in a mini version, which is 150 cm deep. Mini Eclipse is available in G14-G21 and must be mounted on the awning for use (cannot be mounted directly on the caravan).

MATERIALS

NEW

NEW

STABILO SYSTEM MEGA

This system is supplied as standard with all Megasteel windscreens and ensures full stability. This double base allows you to join two Megasteel windscreens by simply hammering an extra spike into the ground.

Stabilo System Mega is flush with the ground, allowing you to mow the lawn over the base without having to remove it. Simply remove your windscreen before you begin. If you wish to join two windscreens, you can buy a separate top connector, which prevents your windscreen from gaping at the top.

NB: Megasteel and Stabilo System Mega cannot be purchased separately as they do not fit other windscreens.

NEW

WINDSCREEN GATE

120 cm, Mega, Granite

Dimensions: 80 x 115 cm

Weight: 3.70 kg

Materials: Acrylic, Frame: Mega

Colours: Granite

The gate is an optional extra for wind-screens with a Mega frame. The gate is made from acrylic material.

Isabella Flooring Concept

Isabella – layer upon layer

Start by laying Ground Cover over an area bigger than the awning to protect the mudflaps and awning materials. Then lay Isabella Floor over the entire awning area, remember the edging strips for a neat finish especially in doorways. A Comfort Carpet keeps the heat in and is soft and comfortable to walk on. Finally, lay an Isabella Carpet for a beautiful finish that's easy to keep clean.

5 ISABELLA CARPET

Page 64

4 ISABELLA COMFORT CARPET

is a soft, insulating comfort underlay which is placed between the plastic barrier or wooden floor and the awning floor covering to keep cold and damp at bay. It also provides a soft floor area to sit and walk on. Supplied on rolls of 1.5 x 15 m (22.5 m²).

3 ISABELLA GROUND SHEET

The Isabella Ground Sheet is available in different sizes to fit the awnings. Put it under the awning carpet to avoid moisture from the soil. Isabella Ground Sheet has plastic reinforcements in the corners with ring for pegging and reinforced edges, so it will last for years. Colour: Anthracite. Material: PU 160 g/m²

Depth: 270, 320 or 370 cm

Lengths: 500, 600, 700 or 800 cm.

2 ISABELLA FLOOR

If you spend a lot of time in your awning, you want good insulation, and a floor that is smooth and level. Isabella Floor offers a full range of advantages. It is easy to install without the use of tools, the 50 x 50 cm tiles simply snap together like building blocks, no other parts are needed. It is easy to store and exceptionally durable.

1 ISABELLA GROUND COVER

is the perfect underlay – a thin but strong sheet that lies on the ground, it protects the awning canvas from soil and mud, and because the mudflaps are not in contact with the ground they are easier to clean.

Supplied on rolls of 2 x 18 m (36 m²). Ground Cover is fully breathable and suitable for touring sites.

Camping comfort starts at floor level

Isabella's Flooring Concept gives you a host of options, no matter how you camp. We have developed a concept that allows you to customise the different elements to your actual needs. You get the ultimate solution, whether you're permanent pitcher, a touring caravanner, a year-round caravanner, a summer caravanner or...

The underlay types are the same – it's the composition of them that makes all the difference. You can focus on what is most important to you and your way of camping: stability, finish, cleaning or comfort. Here are three suggestions:

FOR THE TOURING CARAVANNER

who travels around and values comfort and easy cleaning highly, we recommend:

- 1 ISABELLA GROUND COVER... to protect the awning from mud.
- 3 ISABELLA GROUND SHEET... to prevent moisture from rising up from the ground.
- 5 ISABELLA CARPET... for a beautiful finish that is easy to keep clean.

FOR THE SEASONAL CAMPER

who remains in one place and values comfort and easy cleaning highly, we recommend:

- 1 ISABELLA GROUND COVER... to protect the awning from mud.
- 3 ISABELLA GROUND SHEET... to prevent moisture from rising up from the ground.
- 4 ISABELLA COMFORT CARPET... for an insulating, soft comfort.
- 5 ISABELLA CARPET... for a beautiful finish that is easy to keep clean.

FOR THE PERMANENT PITCHER

who always stays in the same place and values comfort, a firm surface and easy cleaning highly, we recommend:

- 1 ISABELLA GROUND COVER... to protect the awning from mud.
- 2 ISABELLA FLOOR... for a firm, even floor.
- 3 ISABELLA GROUND SHEET... to prevent moisture from rising up from the ground.
- 4 ISABELLA COMFORT CARPET... for an insulating, soft comfort.
- 5 ISABELLA CARPET... for a beautiful finish that is easy to keep clean.

For more information about the Isabella Flooring Concept, visit Isabella.net.

ISABELLA FLOOR

With the option to purchase edges for Isabella Floor, you can create a beautiful finish.

Isabella Floor uses a unique interlocking system.

ISAGRIP

IsaGrip is a clip used to hold carpets and underlay in place. IsaGrip is easy to fit without damaging the carpet. 900060290

Isabella Carpet – Stylish floor covering for your awning

Isabella Carpet is available in three different colourways that perfectly match your Isabella awning. The North, Flint and Dawn colourways are used throughout the Isabella awning collection. This means you can combine elements however you like. You might prefer to combine a Flint carpet with a Flint awning, or perhaps mix a Dawn carpet with a North awning?

Our quality carpets are made in a smooth-woven combination of nylon threads, spun with PVC and finished in a heat press, so they can be fitted to any awning and even trimmed without fraying; they are lightweight and can be easily folded and cleaned. Depth: 2,5 m, 3 m or 3,5 m .

NORTH

inspired by the deep ocean blue. The colours are subdued and raw, with clear references to the Nordic look.

DAWN

inspired by misty morning landscapes, with a mild and subdued tone-upon-tone colour scheme.

FLINT

inspired by flint as a material, where dark grey shades are combined with sharp edges.

Curtains

All Isabella and Ventura awnings are supplied with curtains. The curtains are carefully designed to match the awning colours for a harmonious look. The specially developed curtain system ensures that it is easy to put up and take down again.

All Isabella curtain materials are given a finishing treatment to withstand environmental impacts, such as mould, rot, fungi or mildew, usually caused by differences in temperature. This special finishing treatment can be restored after washing by ironing the curtain.

Buy with confidence

At Isabella, we know how important it is to provide the best service. That's why we do all we can to be the best. We don't just want our customers to be happy, satisfied campers. We want the most satisfied customers, so we know we always need to go the extra mile. We strive to make buying an Isabella awning a positive experience, and we hope it will provide the setting for lots of great camping experiences.

SERVICE CLOSE AT HAND

With our large Isabella dealer network throughout Europe, you can be confident that service is always close at hand. If any repairs are required, our dealers are ready to provide the best possible assistance. They deliver your awning to our experienced Isabella service team, who will do their utmost to ensure you can get your awning back again as soon as possible.

Accessories that enrich your life on the campsite

Whether you're a permanent pitcher or a touring caravanner, and whether you're into campsites or setting up camp in the open air, our accessories have you covered. Nordic design. Durable quality. Functional and always at the leading edge.

Our accessories are designed with a view to enriching your life on the campsite, with details that only add to the joy of camping. And with features that make things easier, moment by moment. In short: a collection offering everything that your camper's heart desires – from practical furniture to smart electronic solutions designed for outdoor living.

Camping furniture

Isabella offers a wide selection of stable, but lightweight camping furniture. All furniture in the range can be folded to take up a minimum of space. Ideal for camping trips and furnishing the awning.

NEW

CAMPING DINING TABLE

Stable dining table made for camping life. The table has a stylish look with rounded edges and corners and slightly angled legs. The angle and height of the four table legs are adjustable, so uneven surfaces are no problem. The steel frame under the table can be folded. Once folded up, the table is just 6 cm high.

The dining table can withstand all kinds of weather and is resistant to the Sun's UV rays. The table surface is easy to clean. You can even place hot saucepans directly on top without causing damage (heat-resistant up to 180°C).

NEW

ULTRA LIGHTWEIGHT CAMPING TABLE

Ultra lightweight camping table for those heading out on new adventures. Despite its low weight of just 5.3 kg/6.4 kg, this lightweight table is both stable and functional. The aluminium frame under the table folds together easily and elegantly at the back, making the table practical to transport and store when not in use. When folded, the lightweight table measures just 6.5 cm in height.

The table top has rounded corners and is made of several layers of fibre glass. There is plenty of legroom under the table, and both the height and the tilt of the four table legs are adjustable – so uneven ground is not a problem.

120 X 80 CM

Height: 72–74 cm
Maximum load: 80 kg
Folded dimensions: 120 x 80 x 6 cm
Weight: 5,3 kg
Frame: Aluminium
700006274

140 X 90 CM

Height: 72–74 cm
Maximum load: 80 kg
Folded dimensions: 140 x 90 x 6 cm
Weight: 6,4 kg
Frame: Aluminium
700006275

Spacious and practical

Unique storage cupboards with smart folding method, which means that the cupboards can be closed like a suitcase. The four legs are "snapped" into the bracket and folded into the cupboard, when folding it together. The cupboard comes with a practical bag for easy transportation.

Folding cabinet "Single" and "Double" has a lid on the top so that a pop-up tower with mains socket can be mounted on it. The pop-up tower should be removed when the cabinet is packed away.

CORNER CUPBOARD

With 2 shelves and fixed top.
With storage bag
Measurements: 82 x 82 x 85 cm.
Weight: 9 kg.
Load: 30 kg.
700006226
